DIG 123 · Lab 03 — Conditions of the lab

Module 5 · Stories and numbers: the Sprint 1 Kit & User Story Set · Class 5 · Monday, October 19, 2026 Brick D4 + D5 (merged) — Sprint 1 Kit & User Story Set · Feedback date: Sunday, October 25, 2026, 23:59 · Final deadline (all labs): Sunday, December 20, 2026, 23:59

Educational material — Cyber.SoHo © 2026 Cyber.SoHo. All rights reserved. Licensed to you personally, for your own study and for the activities of the course you are enrolled in (Legal Notice, Terms of Use and Acceptable Use Policy, §4.2). Do not copy, post, upload, share or sell it, and do not feed it into any machine-learning system (§4.3). Opening this document means you accept the Notice (§2). The student acknowledgement form (Annex A, e-signature) is provided as a separate file.

This document states the **conditions** of Lab 03: what you hand in, how, when, how it is marked and which rules apply. The step-by-step instructions are in the full lab (`DIG123_Lab03_Module5_Sprint1-Kit-User-Story-Set_FULL.md`); a two-page summary is in the brief. When this document and another one disagree, **this document and the professor's announcements on Blackboard prevail**.

Why "Lab 03"? The course has one lab every second module. Module 4 (October 12) had no lab, so this is the third lab. It merges the two bricks of the first schedule, D4 (Sprint 1 Kit) and D5 (User Story Set & forecast), into one brick that fits three hours.

---

1. Purpose

Your team turns the plain-language Product Backlog of Class 4 into a backlog that can be built and measured: **eight user stories**, each with a one-line acceptance test; a **Definition of Done** of five yes-or-no checks; a **Sprint Goal** that states an outcome; **story points** (Planning Poker) and **MoSCoW** (Must have, Should have, Could have, Won't have this time) letters; a **release forecast** (points ÷ velocity); three real **Daily Scrum** lines; the **Sprint 1 burndown chart**; and a five-line **Sprint Review and Retrospective** written when Sprint 1 ends on Sunday, October 25.

The lab practises **LO (Learning Outcome) 3 and 4** of the syllabus: the foundations of Scrum, and applying work methodologies to your own project.

2. Time and organisation

Condition	Rule
Ponderation	**1 · 2 · 1**: 1 hour of lecture (the input, not counted as lab work) · **2 hours of Team Studio in class** · **1 hour of Home Sprint**. The lab is designed to take **3 hours of work at most**. If your team is far above that, tell the professor — the scope is too large, not your team too slow.
In class (120')	Planning 10' · Eight user stories 40' · Definition of Done 10' · Planning Poker and MoSCoW 20' · Sprint Goal and forecast 15' · Sprint Review 15' · Retrospective 5' · Plan the week 5'. There is no quiz on October 19 (**CQ2**, Checkpoint Quiz 2, is on October 26).
At home (60')	Three Daily Scrum lines 10' · Burndown chart 15' · Sprint 1 Review and Retrospective, five lines 15' · Checks and a cold read 10' · Export and submit 10'. **Nothing new starts at home** except these.
Weekly routine (outside the 3 hours)	Read Denning, *The Age of Agile*, Chapter 5 "Implementing Agile at Scale: Microsoft" (in VitalSource Bookshelf); write your Learning Log.
Team	Your team of 4 (3–5 where the class size requires it), the same team and the same product as D1 to D3. Today's **PO** (Product Owner) is member 2 and the **SM** (Scrum Master) is member 3 of your rotation table.
Hats	Facilitator · Timekeeper · Scribe · Presenter, given out at Planning and rotated every Monday. They are separate from the Scrum accountabilities.
Attendance	Taken at the start of the lecture and at the end of the Team Studio. A member absent from the studio contributes during the Home Sprint and says so in the Learning Log.

3. What you hand in

3.1 The team brick — D4 + D5, Sprint 1 Kit & User Story Set. One **PDF** (Portable Document Format), **four pages at most** (a fifth page is allowed only for photographs of paper boards). It has eight boxes, in this order:

Box	Content	Minimum to be complete
1 · The eight stories	"As a … I want … so that …", the INVEST (Independent, Negotiable, Valuable, Estimable, Small, Testable) row, story points, MoSCoW letter; totals per letter; the reason for each Won't; the later list.	The *who* is a user of your D2; at most one ✗ per story, each explained; Must ≤ about 60 % of the points.

Box	Content	Minimum to be complete
2 · Acceptance tests	One line per story: *Given … when … then ….*	Every *then* is observable by a person who did not write it.
3 · Definition of Done	Five numbered yes-or-no checks and the rule sentence.	Each check can be answered by someone other than the author in ten minutes or less.
4 · Sprint Goal and content	One sentence stating an outcome for a user; the stories of Sprint 1 and their points (the burndown total).	The goal can be judged "met / not met" by looking at one thing.
5 · Release forecast	Release scope; remaining after Sprint 1; planned and cautious Sprints needed; two end dates; one sentence on what would make the cautious case happen.	The numbers follow the formulas of the full lab, step 4c.
6 · Three Daily Scrum lines	Date · progress toward the Sprint Goal · impediment · what changes in the plan.	Three real lines on three different days.
7 · Sprint 1 burndown	A chart with an ideal and an actual line (day 1 = Oct 12 … day 14 = Oct 25), its data table, a two-sentence reading, scope-change notes.	The ideal line starts at the Box 4 total and reaches 0 on day 14.
8 · Review and Retrospective	Five lines: goal · numbers (real velocity, updated forecast) · voice of the user · change for Sprint 2 (owner, date) and any shortcut to repay · what to keep.	Real velocity and the updated forecast are written.

A **footer** closes the page: members, hats, PO and SM, tools used (or built), the Sprint Review question and your answer, the three retrospective notes, and whether AI (Artificial Intelligence) tools were used and for what.

3.2 The Learning Log — individual. Five lines, written by each member alone: what I did · what I learned · what surprised me · one question I still have · one thing I will apply next week. Submitted in the text box of the assignment (or as `DIG123_D4D5_Log_<YourName>.txt`).

3.3 Format and naming. File name: `DIG123_D4D5_<TeamName>_<date>.pdf` (example: `DIG123_D4D5_Aurora_2026-10-25.pdf`). Keep the box order of the template (`DIG123_Lab03_D4D5_Template.md`); graders read top to bottom. Any tool may produce the PDF; a clear photograph of a paper board inserted in the PDF is accepted.

4. Dates, submission and resubmission

Date	What happens
Mon Oct 19, 2026	Lab 03 starts in class (Sprint 1 is in its second week).

Date	What happens
Sun Oct 25, 2026, 23:59 — feedback date	The last day of Sprint 1. Hand in the version you have. You receive written feedback before Lab 04, and this version is part of your **Mid-Term Basis Kit** (Mid-Term: Mon Nov 16).
Oct 26 → Dec 20	You may improve the brick after the feedback and resubmit as often as needed. Each new version keeps the same name with the new date.
Sun Dec 20, 2026, 23:59 — final deadline	The **last version submitted by then is the one graded**. This is the single final deadline of **all** labs (Lab 01 to Lab 05) and of the Portfolio v1.0.

- **Where:** Blackboard → DIG 123 → Assignments → *D4 + D5 — Sprint 1 Kit & User Story Set*. **Each member** submits the team PDF and their own Learning Log.
- **After Dec 20, 23:59:** a lab not submitted scores 0. Exceptions only under the university's accommodation and attendance policies, arranged with the professor before the deadline.
- **Not handing in on the feedback date** costs no marks, but you receive no feedback and you will write the Mid-Term without this page on your desk.

5. Lab calendar to December 20

Labs come every second module, so that each one can be done well. The three Studio Weeks of December are reserved for finishing, improving after feedback and assembling the Portfolio.

Lab	Module · Class · Date	Brick	Feedback date
Lab 01	Module 1 · Class 2 · Mon Sep 28	D2 · Product Vision Board	Sun Oct 4
Lab 02	Module 3 · Class 3 · Mon Oct 5	D3 · Scrum Team Charter	Sun Oct 11
—	Module 4 · Class 4 · Mon Oct 12	No lab — Scrum events practised in the studio; Sprint 1 starts	—
Lab 03	**Module 5 · Class 5 · Mon Oct 19**	**D4 + D5 · Sprint 1 Kit & User Story Set**	**Sun Oct 25**
—	Module 6 · Class 6 · Mon Oct 26	No lab — CQ2 and Kanban practice in the studio	—
Lab 04	Module 7 · Class 7 · Mon Nov 2	Flow & Digital Business Brief	Sun Nov 8
—	Mon Nov 9 · Mon Nov 16	Mid-Term Review · **Mid-Term** (from your own D1, D2, D3, Lab 03, Lab 04 as handed in by Nov 8)	—
Lab 05	Module 10 · Class 10 · Mon Nov 23	Design Thinking Pack	Sun Nov 29

Lab	Module · Class · Date	Brick	Feedback date
Studio Weeks	Mon Nov 30 · Mon Dec 7 · Mon Dec 14	No new lab — finish, improve, assemble Portfolio v1.0; questions on the Blackboard Q&A board	—
All	**Sun Dec 20, 2026, 23:59**	**Final versions of Labs 01–05 + Portfolio v1.0**	—

6. Tools are open — research them, or create your own

- **Every tool, technique and template named in this lab is a starting point, not a requirement.** You may replace any of them with any other tool or technique that is suitable and available to your team — or **create your own** (a spreadsheet that draws the burndown, a small script that computes the forecast, a card layout, a web page). Creativity is welcome and noticed. Planning Poker needs only your fingers.
- **Research thoroughly before you adopt a tool** (about ten minutes per tool): official site only · free-tier limits · licence and terms of use, including what happens to your data (Legal Notice §6.6, §14) · check the link with VirusTotal and Google Safe Browsing (Annex C) · try it for five minutes as a team. Name the tools you chose or built in the footer. This is not a cybersecurity course; the check is a two-minute habit.
- Starting points (official sites; checked October 2026, free tiers change): tables and charts — Google Sheets, LibreOffice; boards — Trello, GitHub Projects, Focalboard, Taiga; diagrams and charts as text — Excalidraw, draw.io, Mermaid.
- No tool is required to be paid for, installed on a personal device, or used with a personal account you do not want to create. Paper and graph paper are always accepted.

7. How the lab is marked

7.1 Team mark — D4 + D5 out of 10.

Points	Criterion	Full marks	Half marks	Zero
4	**The eight user stories** (Boxes 1–2)	A real D2 user in every story; actions without technique; a real benefit; an honest INVEST row; observable *then* in every test; the order stated with reasons.	A *so that* that repeats the *I want*, or tests that cannot be observed, or an INVEST row that is all ✓.	Stories or tests missing.
3	**The Sprint 1 Kit** (Boxes 3, 4, 6)	Five numbered yes-or-no checks and the rule sentence; a Sprint Goal that states an outcome; three real Daily Scrum lines with four parts.	Checks that are feelings ("good quality"); a goal that lists tasks; lines without a changed plan when behind.	Missing.

Points	Criterion	Full marks	Half marks	Zero
3	**The numbers and the lessons** (Box 1 letters, Boxes 5, 7, 8)	Points and MoSCoW with reasons; correct forecast with two dates; burndown whose ideal line starts at the total; five Review and Retrospective lines with real velocity and an updated forecast.	A formula error; a burndown with no ideal line; review lines without numbers.	Missing.

7.2 Individual adjustment — the Learning Log. Present and specific: full share of the team mark. Present but generic ("I learned about stories"): −1 point for that student. Missing: −50 % of this brick for that student.

7.3 Weight in the course. The syllabus fixes Continuous Assessments 30 % · Mid-Term 30 % · Final 40 %. Inside the 30 %: bricks (D1 and Labs 01–05) 16 % — D1 ≈ 1.5 %, each lab ≈ 2.9 % · Portfolio v1.0 6 % · Checkpoint Quizzes 4 % · in-class activity points 4 %. The professor confirms the split on Blackboard; that announcement prevails.

8. Rules — integrity, AI, privacy, sharing

- **Own work.** The page is your team's; the Learning Log is yours alone. The university's Academic Honesty Policy and Legal Notice §18 "Academic Integrity and Submitted Work" apply; submissions go through SafeAssign.
- **AI (Artificial Intelligence) tools** may be used for spelling, grammar and the meaning of words only — not to write the stories, tests, checks, estimates or review lines. Declare any use in the footer. The professor's Blackboard announcement prevails if it differs.
- **Sources.** Every definition you quote has its source. The Scrum Guide may be quoted under its licence (CC BY-SA 4.0 — Creative Commons Attribution-ShareAlike 4.0 International) with the source named. The Scrum Guide does not prescribe user stories, points or burndown charts; they are common practices used in this course.
- **Privacy.** Members' first names only; no contact details; nothing about anyone outside the team. A real user or stakeholder at your Review is "a student" or "the manager", never named (Legal Notice §6.7, §20).
- **Third-party tools.** You are responsible for their terms and for your data in them (§6.6, §14).
- **Sharing.** This document, the lab and the template are not to be posted on note-sharing or "study help" sites (§4.3). Your own submitted work remains your copyright (§18.3).
- **No recording** of the class or the studio without the professor's permission (§17).
- **As is.** Links and examples were correct in October 2026; sites and tools change (§11).

9. Help

- **Questions about the lab:** in the studio, ask the professor; between classes, the Blackboard Q&A board (answered within 48 hours).
- **Writing support:** tutor.com, free for every student through Blackboard (*Course and institution tools*).

- **Accessibility or a personal circumstance** affecting a date: contact the professor and the university's student services **before** the deadline.

10. Checklist before you submit

- [ ] Four pages at most; eight boxes in order; footer complete.
- [ ] Eight stories: a D2 user, an action without technique, a real benefit; INVEST row with at most one ✗ each; points and a MoSCoW letter; Must ≤ about 60 %.
- [ ] Eight acceptance tests with an observable *then*, read by a second member.
- [ ] Definition of Done: five numbered yes-or-no checks and the rule sentence.
- [ ] Sprint Goal: one sentence, an outcome, judged by one thing.
- [ ] Forecast: both formulas computed; two end dates; one sentence.
- [ ] Three real Daily Scrum lines; burndown with ideal and actual lines; five Review and Retrospective lines with real velocity.
- [ ] File named `DIG123_D4D5_<TeamName>_<date>.pdf`; every member submitted it with their own Learning Log.

Abbreviations: AI (Artificial Intelligence) · **CC BY-SA 4.0** (Creative Commons Attribution-ShareAlike 4.0 International) · **CQ2** (Checkpoint Quiz 2) · **D1–D5** (Deliverable 1–5) · **INVEST** (Independent, Negotiable, Valuable, Estimable, Small, Testable) · **LO** (Learning Outcome) · **MoSCoW** (Must have, Should have, Could have, Won't have this time) · **PDF** (Portable Document Format) · **PO** (Product Owner) · **SM** (Scrum Master).
