DIG 123 · Lab 02 — Conditions of the lab

Module 3 · Scrum I: the framework, the pillars, the roles · Class 3 · Monday, October 5, 2026 Brick D3 — Scrum Team Charter · Feedback date: Sunday, October 11, 2026, 23:59 · Final deadline (all labs): Sunday, December 20, 2026, 23:59

Educational material — Cyber.SoHo / Asen Grozdanov. © 2026 Cyber.SoHo. All rights reserved. Licensed to you personally, for your own study and for the activities of the course you are enrolled in (Legal Notice, Terms of Use and Acceptable Use Policy, §4.2). Do not copy, post, upload, share or sell it, and do not feed it into any machine-learning system (§4.3). Opening this document means you accept the Notice (§2). The student acknowledgement form (Annex A, e-signature) is provided as a separate file.

This document states the **conditions** of Lab 02: what you hand in, how, when, how it is marked and which rules apply. The step-by-step instructions are in the full lab (`DIG123_Lab02_Module3_Scrum-I_Team-Charter_FULL.md`); a two-page summary is in the brief. When this document and another one disagree, **this document and the professor's announcements on Blackboard prevail**.

1. Purpose

Your team sets up its Scrum Team for the rest of the semester: who is **Product Owner**, **Scrum Master** and **Developer** at each Team Studio; what each accountability means *for your product*; how the team makes its work visible, inspects it against a measurable limit and adapts; which behaviours show the five Scrum values; whether the team has the skills it needs; and where Scrum comes from, in five to seven sourced dates.

The lab practises **LO (Learning Outcome) 1, 3 and 4** of the syllabus: the concept and utility of Agile methodologies; the foundations of Scrum; applying work methodologies to your own project.

2. Time and organisation

Condition	Rule
Ponderation	**1 · 2 · 1**: 1 hour of lecture (the input, not counted as lab work) · **2 hours of Team Studio in class** · **1 hour of Home Sprint**. The lab is designed to take **3 hours of work at most**. If your team is far above that, tell the professor — the scope is too large, not your team too slow.
In class	The Team Studio of Class 3 opens with **CQ1 (Checkpoint Quiz 1)**, individual, 15 minutes, closed book. The remaining 105 minutes are lab work: Planning 5' · Roles roulette 20' · Role cards 30' · Empiricism plan and values pledge 20' · Cross-functional check 10' · Sprint Review 15' · Retrospective 5'.
At home	Scrum history timeline 25' · Polish 15' · Four checks and a cold read 10' · Export and submit 10'. **Nothing new starts at home.**
Weekly routine (outside the 3 hours)	Read the Scrum Guide 2020 (about 13 pages) and Denning, *The Age of Agile*, Chapter 3 (in VitalSource Bookshelf); write your Learning Log.
Team	Your team of 4 (3–5 where the class size requires it), the same team as D1 and D2. The **product is fixed** from today for the rest of the semester.
Hats	Facilitator · Timekeeper · Scribe · Presenter, given out at Planning and rotated every Monday. They are separate from the Scrum accountabilities.
Attendance	Taken at the start of the lecture and at the end of the Team Studio. A member absent from the studio contributes during the Home Sprint and says so in the Learning Log.

3. What you hand in

3.1 The team brick — D3, Scrum Team Charter. One PDF (Portable Document Format), **three pages at most** (a fourth page is allowed only for photographs of paper boards). It contains six boxes, in this order:

Box	Content	Minimum to be complete
1 · Rotation table	The draw method and the member order; eight rows (Class 4, 5, 6, 7, 10 and the three Studio Weeks) with Product Owner, Scrum Master and Developers; the two rule checks.	Each member is Product Owner once and Scrum Master once between Oct 12 and Nov 2; nobody holds both in one row.
2 · Role cards	One card each for Product Owner, Scrum Master and Developers, five lines each: *accountable for* · three responsibilities · *decides* · *does not decide* · one anti-pattern with its visible sign.	No decision appears on two cards, except the Sprint Goal (whole team).
3 · Empiricism plan	One line each for transparency, inspection and adaptation; one **acceptable limit** expressed as a number.	The inspection line states when, what and by whom.
4 · Values pledge	One observable behaviour for each of commitment, focus, openness, respect and courage.	Each behaviour passes the filming test.
5 · Cross-functional check	A skills matrix (0 / 1 / 2 per member and skill), the team's best level per skill, a plan line for every gap; the communication paths of your team and of a team of 10.	Every gap has a plan; the path numbers are correct.
6 · Scrum history timeline	Five to seven milestones (at least 1986, 1995, 2001, 2010, 2020): year, name, one sentence of at most 30 words in your own words, one `https://` source you opened.	Every sentence is sourced and within 30 words.

A **footer** closes the page: members and hats, tools used (or built), the Sprint Review question and your answer, the three retrospective notes, and whether AI (Artificial Intelligence) tools were used and for what.

3.2 The Learning Log — individual. Five lines, written by each member alone: what I did · what I learned · what surprised me · one question I still have · one thing I will apply next week. Submitted in the text box of the assignment (or as `DIG123_D3_Log_<YourName>.txt`).

3.3 Format and naming. File name: `DIG123_D3_<TeamName>_<date>.pdf` (example: `DIG123_D3_Aurora_2026-10-11.pdf`). Keep the box order of the template (`DIG123_Lab02_D3_Template.md`); graders read top to bottom. Any tool may produce the PDF; a clear photograph of a paper board inserted in the PDF is accepted.

4. Dates, submission and resubmission

Date	What happens
Mon Oct 5, 2026	Lab 02 starts in class (CQ1 first).
Sun Oct 11, 2026, 23:59 — feedback date	Hand in the version you have. You receive written feedback before Lab 03, and this version is part of your **Mid-Term Basis Kit** (Mid-Term: Mon Nov 16).
Oct 12 → Dec 20	You may improve D3 after the feedback and resubmit as often as needed. Each new version keeps the same name with the new date.
Sun Dec 20, 2026, 23:59 — final deadline	The **last version submitted by then is the one graded**. This is the single final deadline of **all** labs (Lab 01 to Lab 05) and of the Portfolio v1.0.

- **Where:** Blackboard → DIG 123 → Assignments → *D3 — Scrum Team Charter*. **Each member** submits the team PDF and their own Learning Log; this guarantees that every student holds a personal copy for the Mid-Term.

- **After Dec 20, 23:59:** a lab not submitted scores 0. Exceptions only under the university's accommodation and attendance policies, arranged with the professor before the deadline.
- **Not handing in on the feedback date** costs no marks, but you receive no feedback and you will write the Mid-Term without this page on your desk.

5. Lab calendar to December 20

Labs come every second module, so that each one can be done well. The three Studio Weeks of December are reserved for finishing, improving after feedback and assembling the Portfolio.

Lab	Module · Class · Date	Brick	Feedback date
Lab 01	Module 1 · Class 2 · Mon Sep 28	D2 · Product Vision Board	Sun Oct 4
Lab 02	**Module 3 · Class 3 · Mon Oct 5**	**D3 · Scrum Team Charter**	**Sun Oct 11**
—	Module 4 · Class 4 · Mon Oct 12	No lab — Scrum events practised in the studio; Sprint 1 starts	—
Lab 03	Module 5 · Class 5 · Mon Oct 19	Sprint 1 Kit & User Story Set	Sun Oct 25
—	Module 6 · Class 6 · Mon Oct 26	No lab — CQ2 (Checkpoint Quiz 2) and Kanban practice in the studio	—
Lab 04	Module 7 · Class 7 · Mon Nov 2	Flow & Digital Business Brief	Sun Nov 8
—	Mon Nov 9 · Mon Nov 16	Mid-Term Review · **Mid-Term** (from your own D1, D2, D3, Lab 03, Lab 04 as handed in by Nov 8)	—
Lab 05	Module 10 · Class 10 · Mon Nov 23	Design Thinking Pack	Sun Nov 29
Studio Weeks	Mon Nov 30 · Mon Dec 7 · Mon Dec 14	No new lab — finish, improve, assemble Portfolio v1.0; questions on the Blackboard Q&A board	—
All	**Sun Dec 20, 2026, 23:59**	**Final versions of Labs 01–05 + Portfolio v1.0**	—

6. Tools are open — research them, or create your own

- **Every tool, technique and template named in this lab is a starting point, not a requirement.** You may replace any of them with any other tool or technique that is suitable and available to your team — or **create your own** (a spreadsheet that draws the rotation, a small web page, a board on a wall). Creativity is welcome and noticed.
- **Research thoroughly before you adopt a tool** (about ten minutes per tool): official site only · free-tier limits · licence and terms of use, including what happens to your data (Legal Notice §6.6, §14) · check the link with VirusTotal and Google Safe Browsing (Annex C) · try it for five minutes as a team. Name the tools you chose or built in the footer.
- Starting points (official sites; checked October 2026, free tiers change): a fair draw — paper slips, a die, RANDOM.ORG lists; tables — Google Sheets, LibreOffice, the Class 3 companion workbook; boards — Trello, GitHub Projects, Focalboard, Taiga; diagrams — Excalidraw, draw.io, Mermaid.
- No tool is required to be paid for, installed on a personal device, or used with a personal account you do not want to create. Paper is always accepted.

7. How the lab is marked

7.1 Team mark — D3 out of 10.

Points	Criterion	Full marks	Half marks	Zero
4	**Rotation table and role cards** (Boxes 1–2)	Fair draw explained; eight rows; both rules checked; three cards with five specific lines; no decision on two cards; an anti-pattern with its sign on each card.	One rule broken, or cards that list tasks instead of results, or overlapping decisions.	Table or cards missing.
3	**Empiricism plan and values pledge** (Boxes 3–4)	Pillar lines say what, where, when, who; a numeric acceptable limit; five filmable behaviours.	No number in the limit, or two or more slogans instead of behaviours.	Missing or generic.
3	**Cross-functional check and timeline** (Boxes 5–6)	Honest matrix; a plan for every gap; correct path numbers; five to seven milestones ≤ 30 words, each with an opened `https://` source.	A gap without a plan, or unsourced or over-long milestones.	Missing.

7.2 Individual adjustment — the Learning Log. Present and specific: full share of the team mark. Present but generic ("I learned about Scrum"): −1 point for that student. Missing: −50 % of this brick for that student.

7.3 Weight in the course. The syllabus fixes Continuous Assessments 30 % · Mid-Term 30 % · Final 40 %. Inside the 30 %: bricks (D1 and Labs 01–05) 16 % — D1 ≈ 1.5 %, each lab ≈ 2.9 % · Portfolio v1.0 6 % · Checkpoint Quizzes 4 % · in-class activity points 4 %. The professor confirms the split on Blackboard; that announcement prevails.

8. Rules — integrity, AI, privacy, sharing

- **Own work.** The charter is your team's; the Learning Log is yours alone. The university's Academic Honesty Policy and Legal Notice §18 "Academic Integrity and Submitted Work" apply; submissions go through SafeAssign.
- **AI (Artificial Intelligence) tools** may be used for spelling, grammar and the meaning of words only — not to write the cards, the plan, the pledge or the timeline sentences. Declare any use in the footer. The professor's Blackboard announcement prevails if it differs.
- **Sources.** Every timeline sentence is in your own words, with its source. Quotations from the Scrum Guide are allowed under its licence (CC BY-SA 4.0 — Creative Commons Attribution-ShareAlike 4.0 International) with the source named.
- **Privacy.** Members' first names only; no contact details; nothing about anyone outside the team. Skill levels are self-assessments for team planning (Legal Notice §6.7, §20).
- **Third-party tools.** You are responsible for their terms and for your data in them (§6.6, §14).
- **Sharing.** This document, the lab and the template are not to be posted on note-sharing or "study help" sites (§4.3). Your own submitted work remains your copyright (§18.3).
- **No recording** of the class or the studio without the professor's permission (§17).
- **As is.** Links and examples were correct in October 2026; sites and tools change (§11).

9. Help

- **Questions about the lab:** in the studio, ask the professor; between classes, the Blackboard Q&A board (answered within 48 hours).
- **Writing support:** tutor.com, free for every student through Blackboard (*Course and institution tools*).
- **Accessibility or a personal circumstance** affecting a date: contact the professor and the university's student services **before** the deadline.

10. Checklist before you submit

- ☐ Three pages at most; six boxes in order; footer complete.
- ☐ Rotation: each name once in the Product Owner and once in the Scrum Master column between Oct 12 and Nov 2; never both in one row.
- ☐ Role cards: five lines each; no decision on two cards (except the Sprint Goal); an anti-pattern with its sign.
- ☐ Empiricism: a numeric acceptable limit; inspection says when, what, who.
- ☐ Values: five behaviours that could be filmed.
- ☐ Skills: every gap has a plan; paths for your team and for 10.
- ☐ Timeline: five to seven milestones, ≤ 30 words each, each with an `https://` source you opened and checked.
- ☐ File named `DIG123_D3_<TeamName>_<date>.pdf`; every member submitted it with their own Learning Log.

Abbreviations: AI (Artificial Intelligence) · **CC BY-SA 4.0** (Creative Commons Attribution-ShareAlike 4.0 International) · **CQ1, CQ2** (Checkpoint Quiz 1, 2) · **D1, D2, D3** (Deliverable 1, 2, 3) · **LO** (Learning Outcome) · **PDF** (Portable Document Format).
